

HT-Air MKII

Attainable Excellence

Introducing the HT-Air MKII - the epitome of affordable, superior wireless sub bass audio. This entry-level powerhouse, designed for .1 LFE or 2-channel sub bass transmission, operates on a robust 5.8GHz frequency, delivering immersive wireless audio that perfectly complements our HT/ MKII subwoofers.

Incredibly user-friendly, the HT-Air MKII promises quick, effortless pairing for a seamless audio experience. Furthermore, the wireless capabilities of the HT-Air MKII offer flexibility, enabling our subwoofers to adapt to challenging spaces and set ups in both 2-channel and home theatre applications.

This new model is a significant step-up from its predecessor, merging improved industrial design with advanced wireless functionality. Epitomizing REL's dedication to detail, the refined fit and finish of the HT-Air MKII underscores our commitment to quality at all price points.

Welcome to a new era of sound and flexibility – elevate your subwoofer experience with the HT-Air MKII.
